## New REACT! Loss Prevention Poster Published on COVID-19

Dean Crossley  
Loss Prevention Manager

A new poster has been added to the Club's recently released REACT! series of medical and first aid posters that specifically addresses essential information related to the ongoing COVID-19 situation. The poster illustrates the early symptoms of the virus and advises several easy measures to help control its spread.

The Club recommends displaying the poster within all public access accommodation spaces and at the gangway. A larger format for gangway use can be created by printing the segmented version of the poster and then merging these together – See instructional guidance below:

Members will be sent complimentary copies of the poster for use on their vessels in due course. If further copies are required these can be downloaded as PDF files from the website or requested from the Loss Prevention Department.
