## Neptune - Bunker Info tab updates

**Dmitry Kisil**  
Senior Loss Prevention Officer

**The latest set of bunker quality data has been uploaded to our Neptune portal.**

*Busan port is a leading provider of HFO, VLSFO and MGO bunkers within Asia Pacific region in 2022. During this period 100% of fuel samples tested by Veritas Petroleum Services have complied with sulphur content requirements. Technical parameters have been found off-spec in 3.5%, 0.7% and 3.2% cases respectively.*

*Bunker analysis stats provided by VPS are available online for world's top ten bunkering ports. Expanded options from West's bunker quality advisory service are available upon request from Loss Prevention Department.*

### Visit our Neptune portal.

Neptune is an advanced interactive geographical information platform exclusively for West Members, brokers and correspondents. It offers a comprehensive range of regularly updated data sources to assist those involved in shipping operations with heightened situational awareness.
