## Neptune - Bunker Info tab updates

**Dmitry Kisil**  
Senior Loss Prevention Officer

**The bunker quality data have been updated. Statistics collected in 2020-2022 are available on Neptune. Please log in and go to the Bunker Info tab.**

Compliance with VLSFO sulphur content limits in Rotterdam and New York has improved in 2022 but may still be problematic in Antwerp. In 2022 cat fines were within the 15-40 ppm band in about 50% of VLSFO samples tested globally.

Figures for the world's top ten bunkering ports provided by Veritas Petroleum Services are available online. Data on other bunkering locations, on a specific historical interval, or on a particular quality parameter is available upon request from Loss Prevention Department.
