Offshore product rebranded to recognise the renewable energy market

We are pleased to announce the rebranding of our Offshore product to “Offshore & Renewable Energy” to encompass the industry’s shift towards the renewable energy sector. Whilst we have always provided cover for Members operating in the sector, it is important to recognise the growth and importance of this market.

The renewable energy sector brings its own set of challenges in terms of liability coverage. At West, we are equipped to provide solutions to these matters utilising our experienced team of Offshore specialists that include Will Tobin, Nigel Burrige, Suumit Madhu and Eleanor Torry in Underwriting, as well as Simon Hodgkinson (Global Head of Loss Prevention) and Enam Hussain (Head of Claims (Eastern team)).

We look forward to working with existing and new Members in this exciting and resilient energy sector. In addition to the new brochure and updated website page, we have also produced a contract review guide to assist Members in their contract negotiations.

For further information please see West’s dedicated Offshore & Renewable Energy page on the website which outlines the scope of cover and download links for the product and contract review guides.
